Set up an off-campus connection (one-time procedure)

a. Open the UCD library home page at http://www.lib.ucdavis.edu/

b. On the left navigation bar, click "Connect from Off Campus" to set up a connection. Follow the steps given on the screen.

Then come back here to do the login procedure.

Off-campus login procedure (do it every time you connect—it lasts several hours)

Open the UCD library home page at http://www.lib.ucdavis.edu/

1. Click Electronic Databases (NOT electronic journals on left nav bar)

2. Click P (for PsycINFO)

3. Scroll down to PsycINFO [via CSA Illumina]

Off-campus logon to UC Davis library
by Barbara Sommer (basommer@ucdavis.edu), May 2006

This can drive you a little nuts, but it is well worth it if you want to access the electronic databases without having to be on campus.
Here is the non-intuitive part.

4. Do NOT fill this out. Click Cancel.
   If you get a Prompt screen, cancel it.

You will see this page. Don't panic.

5. Click link to login to campus distauth

6. You are still OK. Click Continue.

7. Now, fill in the login screen with your official campus User Name and Password.
   Click OK (but you are not finished yet).

8. Copy the Password and remember the Username.

9. Click the link below the temporary password to continue.
10. **Paste or type** your **temporary Password** (and temporary User Name if you had a different one on the preceding screen)

   *If your computer automatically puts in your official campus password, you will need to overwrite it.*

11. Do **NOT** check the remember box. Click **OK**.
   You will be given a new temporary password every time you log on.

12. If you see this screen, you are in the database.
